MOLECULAR BIOLOGY OF FIBRINOGEN AND FIBRIN *

Editors and Conference Organizers

Michael W. Mosesson and Russell F. Doolittle

CONTENTS

Opening Remarks. <i>By</i> MICHAEL W. MOSESSON AND RUSSELL F. DOOLITTLE . . .	ix
The Conversion of Fibrinogen to Fibrin: Events and Recollections from 1942 to 1982. <i>By</i> JOHN D. FERRY	1
 Session I. Fibrinogen Structure: Biochemistry	
<i>Co-Chairmen: S. IWANAGA AND E. MIHALYI</i>	
Introductory Remarks. <i>By</i> SADAOKI IWANAGA	11
The Structure and Evolution of Vertebrate Fibrinogen. <i>By</i> RUSSELL F. DOOLITTLE	13
Covalent Structure of Fibrinogen. <i>By</i> AGNES HENSCHEN, FRIEDRICH LOTT- SPEICH, MARIA KEHL, AND CHRISTOPHER SOUTHAN	28
Immunochemical Analysis of the Conformation of Fibrinogen. <i>By</i> E. F. PLOW, T. S. EDGINGTON, AND C. S. CIERNIEWSKI	44
Kinetics and Molecular Mechanism of the Proteolytic Fragmentation of Fibrinogen. <i>By</i> ELEMER MIHALYI	60
The Relationship of Fibrinogen Structure to Plasminogen Activation and Plasmin Activity during Fibrinolysis. <i>By</i> MARSHA ADAMS LUCAS, LARRY J. FRETTO, AND PATRICK A. MCKEE	71
Calcium-Binding Regions in Fibrinogen. <i>By</i> WILLEM NIEUWENHUIZEN AND FRITS HAVERKATE	92
Fibrinogen Heterogeneity. <i>By</i> MICHAEL W. MOSESSON	97
The Plasma Fibrinogen Fraction with Elevated Sialic Acid Content and Elongated γ Chains: Discussion Paper. <i>By</i> P. W. STRAUB, C. KUYAS, AND A. HERBERLI	114
Heterogeneity of Normal Human Fibrinogen due to Two High Molecular Weight Variant γ Chains: Discussion Paper. <i>By</i> CHARLES W. FRANCIS AND VICTOR J. MARDER	118
Congenital Fibrinogen Abnormalities. <i>By</i> D. MÉNACHÉ	121

* This series of papers is the result of a conference entitled Molecular Biology of Fibrinogen and Fibrin held June 2-4, 1982 by the New York Academy of Sciences.

Session II. Fibrinogen Structure: Electron Microscopy and Related Techniques

Co-Chairmen: H. A. SCHERAGA AND R. H. HASCHEMEYER

Electron Microscopic Studies of Fibrinogen Structure: Historical Perspectives and Recent Experiments. <i>By</i> HENRY S. SLAYTER	131
Electron Microscopy of Fibrinogen, Its Plasmic Fragments and Small Polymers. <i>By</i> HAROLD P. ERICKSON AND WALTER E. FOWLER	146
Analysis of Human Fibrinogen by Scanning Transmission Electron Microscopy. <i>By</i> J. WALL, J. HAINFELD, R. H. HASCHEMEYER, AND M. W. MOSESSON	164
Morphology of Fibrinogen Monomers and of Fibrin Protofibrils. <i>By</i> ROBLEY C. WILLIAMS	180
The Structure of Fibrinogen and Fibrin: I. Electron Microscopy and X-ray Crystallography of Fibrinogen. <i>By</i> CAROLYN COHEN, JOHN W. WEISEL, GEORGE N. PHILLIPS, JR., CYNTHIA V. STAUFFACHER, JAMES P. FILLERS, AND ELISABETH DAUB	194
Laser Diffraction of Oriented Fibrinogen Molecules. <i>By</i> ROTRAUT GOLLWITZER, WOLFRAM BODE, HANS-JOSEPH SCHRAMM, DIETER TYPKE, AND REINHARD GUCKENBERGER	214

Session III. Fibrin Formation: Enzymatic Events and Polymerization

Co-Chairmen: L. LORAND AND J. McDONAGH

New Approaches to Old Problems in the Clotting of Fibrinogen. <i>By</i> L. LORAND	226
Factors Influencing Fibrin Gel Structure Studied by Flow Measurement. <i>By</i> MASAHISA OKADA AND BIRGER BLOMBÄCK	233
Fibrinopeptide B in Fibrin Assembly and Metabolism: Physiologic Significance in Delayed Release of the Peptide. <i>By</i> JOHN R. SHAINOFF AND BEATRIZ N. DARDIK	254
Fibrinopeptide Release from Fibrinogen. <i>By</i> HYMIE L. NOSSEL, ANNE HURLET-JENSEN, CHUNG Y. LIU, JAMES A. KOEHN, AND ROBERT E. CANFIELD	269
Calcium Ion Functions in Fibrinogen Conversion to Fibrin. <i>By</i> JAMES J. HARDY, NADIA A. CARRELL, AND JAN McDONAGH	279
Chemical Modification of Fibrinogen and the Effect on Fibrin Formation. <i>By</i> Y. SAITO, A. SHIMIZU, A. MATSUSHIMA, AND Y. INADA	288
Fibrin Polymerization Sites in Fibrinogen and Fibrin Fragments. <i>By</i> ANDREI Z. BUDZYNSKI, STEPHANIE A. OLEXA, AND BHARAT V. PANDYA	301
Synthetic Peptides Modeled on Fibrin Polymerization Sites. <i>By</i> ANDREW P. LAUDANO, BARBARA A. COTTRELL, AND RUSSELL F. DOOLITTLE	315
Interaction of Thrombin and Fibrinogen and the Polymerization of Fibrin Monomer. <i>By</i> HAROLD A. SCHERAGA	330

Session IV. Fibrin Formation: Assembly and Degradation

Co-Chairmen: J. D. FERRY AND J. MARTINEZ

Fibrin Assembly. <i>By</i> ROY HANTGAN, JAN McDONAGH, AND JAN HERMANS	344
The Structure of Fibrinogen and Fibrin: II. Architecture of the Fibrin Clot. <i>By</i> JOHN W. WEISEL, GEORGE N. PHILLIPS, JR., AND CAROLYN COHEN	367
Orientation of Fibrin in Strong Magnetic Fields. <i>By</i> GILBERT HUDRY-CLERGEON, JEAN-MARIE FREYSSINET, JAMES TORBET, AND JEAN MARX	380
The Abnormal Carbohydrate Composition of the Dysfibrinogenemia Associated with Liver Disease. <i>By</i> JOSE MARTINEZ, P. M. KEANE, P. B. GILMAN, AND JOSEPH E. PALASCAK	388
Plasmin Degradation of Cross-Linked Fibrin. <i>By</i> VICTOR J. MARDER AND CHARLES W. FRANCIS	397
The Occurrence and Clinical Relevance of Fibrin Fragments in Blood. <i>By</i> PATRICK J. GAFFEY	407
Vasoactive Peptides Derived from Degradation of Fibrinogen and Fibrin. <i>By</i> TOM SALDEEN	424

Session V. Molecular Mechanisms of Fibrinogen Synthesis and Assembly

Co-Chairmen: E. W. DAVIE AND G. M. FULLER

Introductory Remarks. By GERALD M. FULLER	438
Translational and Cotranslational Events in Fibrinogen Synthesis. By GERALD M. FULLER, JOHN M. NICKERSON, AND MARK A. ADAMS	440
Cloning of Fibrinogen Genes and Their cDNA. By DOMINIC W. CHUNG, MARK W. RIXON, BENITO G. QUE, AND EARL W. DAVIE	449
Regulation and Characterization of the mRNAs for the α , β , and γ Chains of Fibrinogen. By GERALD R. CRABTREE, JEFFREY A. KANT, ALBERT J. FORNACE, JR., CAROL A. RAUCH, AND DANA M. FOWLKES	457
Hormonal Regulation of Fibrinogen Synthesis in Cultured Hepatocytes. By GERD GRIENINGER, PATRICIA W. PLANT, T. JAKE LIANG, ROBERT G. KALB, DAVID AMRANI, MICHAEL W. MOSESSON, KATHE M. HERTZBERG, AND JOHANNA PINDYCK	469
Hepatocyte-Stimulating Factor: A Monocyte-Derived Acute-Phase Regulatory Protein. By DAVID G. RITCHIE AND GERALD M. FULLER	490
The Biosynthesis of Fibrinogen: <i>In Vivo</i> Studies. By WILLIAM R. BELL	503

Session VI. Fibrinogen Interactions with Other Proteins and Cells

Co-Chairmen: T. EDGINGTON AND J. S. FINLAYSON

Interaction of Fibrinogen with Staphylococcal Clumping Factor and with Platelets. By J. HAWIGER, M. KLOCZEWIAK, S. TIMMONS, D. STRONG, AND R. F. DOOLITTLE	521
Fibrinogen Interaction with Platelet Receptors. By STEFAN NIEWIAROWSKI, ELIZABETH KORNECKI, ANDREI Z. BUDZYNSKI, THOMAS A. MORINELLI, AND GEORGE P. TUSZYNSKI	536
The Fibrinogen-Dependent Pathway of Platelet Aggregation. By GERALD A. MARGUERIE AND EDWARD F. PLOW	556
Regulation of Factor XIIIa Generation by Fibrinogen. By C. GERALD CURTIS, TODD J. JANUS, R. BRUCE CREDO, AND LAZLO LORAND	567
"Fibrinogen Oklahoma": A Study of Interactions. By J. S. FINLAYSON	577
Specificity of Fibronectin-Fibrin Cross-linking. By DEANE F. MOSHER AND RUTH B. JOHNSON	583
Enhancement of the Streptokinase-Induced Activation of Human Plasminogen by Human Fibrinogen and Human Fibrinogen Fragment D ₁ . By FRANCIS J. CASTELLINO, DUDLEY K. STRICKLAND, JOSEPH P. MORRIS, JAMES SMITH, AND BAKSHY CHIBBER	595
Fibrin, Fibronectin, and Macrophages. By CELSO BIANCO	602
Binding of Soluble Fibrin to Macrophages. By LAURENCE A. SHERMAN	610
Fibrinogen-Fibrin Interactions with Fibroblasts and Macrophages. By ROBERT B. COLVIN	621
General Discussion	634
Concluding Remarks. By RUSSELL F. DOOLITTLE	636

Poster Papers

Role of Microtubules in Fibrinogen Secretion by Rat Liver Cells. By M. MAURICE AND G. FELDMANN	638
Human Fetal Fibrinogen: Its Characteristics of Delayed Fibrin Formation, High Sialic Acid and AP Peptide Content Are More Marked in Pre-term Than in Term Samples. By DENNIS K. GALANAKIS, JOSE MARTINEZ, CAHIR McDEVITT, AND FREDERICK MILLER	640
Fibrinogen Louisville: An α 16 Arg \rightarrow His Defect that Forms No Hybrid Molecules in Heterozygous Individuals and Inhibits Aggregation of Normal Fibrin Monomers. By DENNIS K. GALANAKIS, AGNES HENSCHEN, MARIE KEELING, MARIA KEHL, RITA DISMORE, AND ELLINOR I. PEERSCHKE	644

<i>Xenopus</i> Fibrinogen: Characterization of Subunits, Post-Translational Modifications, <i>in Vitro</i> Translation, and Glucocorticoid-Regulated Synthesis. By LENÉ J. HOLLAND, JOHN W. WEISEL, AND LAWRENCE J. WANGH	649
The Complete Amino Acid Sequence of Coagulogen Isolated from <i>Limulus polyphemus</i> Amebocytes. By TOSHIYUKI MIYATA, MASUYO HIRANAGA, MARIKO UMEZU, AND SADA AKI IWANAGA	651
Carbohydrate Composition of Normal Fibrinogen Compared to the Abnormal Fibrinogen of Liver Disease. By J. MARTINEZ, P. M. KEANE, AND P. B. GILMAN	655
High Voltage Electron Microscopy of Fibrin Film. By MICHAEL W. MÜLLER, HANS RIS, AND JOHN D. FERRY	658
Control of Fibrinogen Synthesis by Glucocorticoids in the Acute Phase Response. By J. PINDYCK, G. BEUVING, K. M. HERTZBERG, T. J. LIANG, D. AMRANI, AND G. GRIENINGER	660
Preferential Resistance of Fibrinogen Synthesis to Inhibition of Polypeptide Initiation. By P. PLANT, O. MARTINI, G. KOCH, AND G. GRIENINGER	662
Thromboembolic Disease Associated with Defective Lys-Plasminogen Binding Related to an Abnormal Fibrin. By C. SORIA, J. SORIA, AND J. CAEN	664
Monoclonal Antibodies That React Preferentially with Fibrinogen Degradation Products or with Cross-linked Fibrin Split Products. By J. SORIA, C. SORIA, C. BOUCHEIX, M. MIRSHAHI, J. Y. PERROT, A. BERNADOU, M. SAMAMA, AND C. ROSENFELD	665
Regulation of Fibrinogen Receptor on Human Platelets by Changes in Platelet Cyclic AMP Levels. By STANLEY E. GRABER AND JACK HAWIGER	667
Effects of EDTA, Gly-Pro-Arg-Pro, and Amino Acid Replacement on the Thrombin-Catalyzed Release of Fibrinopeptides. By S. D. LEWIS, D. L. HIGGINS, AND J. A. SHAFER	669
Index of Contributors	671
